PROFESSIONAL SUMMARY

Full-stack and backend software engineer with 3+ years of professional experience building scalable web applications, RESTful APIs, transaction systems, and payment integrations. Proficient in JavaScript, Node.js, NestJS, Express.js, React.js, Next.js, PostgreSQL, and Supabase. Delivered 60+ production API endpoints, reduced API response times by 50%, and built secure debit, credit, reconciliation, and payment workflows using authentication, authorization, encryption, and audit logging. Experienced integrating OpenAI, Google Gemini, Paystack, Flutterwave, and background-job services. Contributes to architecture decisions, code reviews, Agile delivery, and engineering mentoring.

TECHNICAL SKILLS

Languages: JavaScript, SQL, PHP, HTML5, CSS3

Backend: Node.js, NestJS, Express.js, RESTful API Design, Multi-Tenant Architecture, Laravel

Frontend: React.js, Next.js, Tailwind CSS, Framer Motion

Databases: PostgreSQL, Supabase, MongoDB, SQL, Query Optimization, ACID Transactions

Integrations: OpenAI API, Google Gemini API, Paystack, Flutterwave, Payment Gateway Integration, LLM Integration

Security: Authentication, Authorization, Role-Based Access Control (RBAC), Encryption, Audit Logging

Tools & Practices: Git, GitHub, Sentry, Inngest, Background Jobs, Cron Jobs, Agile, Scrum, Code Reviews, Testing, Debugging, Performance Optimization

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer | Illuminate Technologies Jan 2026 – Present

- Designed and implemented a multi-tenant platform architecture from initial design through production deployment using Next.js, NestJS, and Supabase.
- Built responsive user interfaces with Next.js, Tailwind CSS, and Framer Motion.
- Integrated OpenAI models to deliver AI-powered platform features and Paystack to support secure payment workflows.
- Implemented production error monitoring and application observability with Sentry; used Git and GitHub for source control and collaboration.

Backend Engineering Mentor | Techrity (Contract) May 2026 – Sep 2026

- Mentored engineers in backend engineering through structured lessons, practical projects, code reviews, and debugging sessions.
- Guided learners on Node.js, RESTful API development, database integration, authentication, and backend engineering best practices.

Full Stack Software Engineer | BuildNet Feb 2025 – Feb 2026

- Reduced API response times by 50% by refactoring blocking operations in a legacy Node.js application and implementing non-blocking asynchronous workflows.
- Designed, built, tested, and deployed 30+ RESTful API endpoints using Node.js and Express.js, enabling new user-facing features.
- Designed transaction workflows for debit, credit, reconciliation, and payment-gateway operations.
- Built background and scheduled jobs with Inngest for batch email, SMS, and notification delivery.
- Implemented authentication, authorization, encryption, and audit logging; optimized database structures and SQL queries for consistency and ACID-compliant transaction processing.

Frontend Engineer | Dreckline Technologies (Contract) Mar 2024 – May 2025

- Contributed to architecture and product decisions during feature planning and implementation.
- Refactored frontend code to improve responsiveness, maintainability, and page-load performance.
- Integrated RESTful APIs into frontend components in collaboration with backend engineers and resolved issues affecting application stability and user experience.

Web Development Trainer, Full Stack | Freelance / Contract Apr 2024 – Feb 2025

- Mentored and trained 20+ aspiring engineers in JavaScript, Node.js, React.js, Git, and full-stack application development.
- Designed a project-based curriculum covering REST APIs, debugging, testing, version control, and Agile collaboration.
- Led practical technical sessions and provided feedback through code reviews and project evaluations.

Next.js Engineer | RioTech Jan 2023 – Dec 2023

- Developed and maintained scalable full-stack web applications using React.js, Next.js, Node.js, and RESTful APIs.
- Integrated third-party libraries and APIs to extend product functionality.
- Collaborated with cross-functional teams during sprint planning and peer code reviews; troubleshot and resolved technical issues to maintain software quality.

EDUCATION

Higher National Diploma (HND), Computer Engineering | Sep 2017 – Dec 2019

National Diploma (ND), Computer Engineering | Sep 2014 – Dec 2016

CERTIFICATIONS

- Career Essentials in Software Development — Microsoft and LinkedIn
- Programming Foundations: Beyond the Fundamentals — Microsoft and LinkedIn
- Career Essentials in Generative AI — Microsoft and LinkedIn
- Career Essentials in System Administration — Microsoft and LinkedIn
- English for IT 1 and English for IT 2 — Cisco Networking Academy
